

## **The autumn novelty 2023**

Coinciding with the SPIEL in Essen, Nürnberger-Spielkarten-Verlag (NSV) is set to launch its next game for this year. **SILVER & GOLD PYRAMIDS** is the sequel to the successful SILVER & GOLD by renowned game designer Phil Walker-Harding.

SILVER & GOLD was released in 2019 and was honored as the "Game Hit for Families" by the Vienna Games Academy in the same year. On a selection of different treasure cards, you're going on an expedition and a score hunt. By using wipeable cards, the game provides unlimited fun.

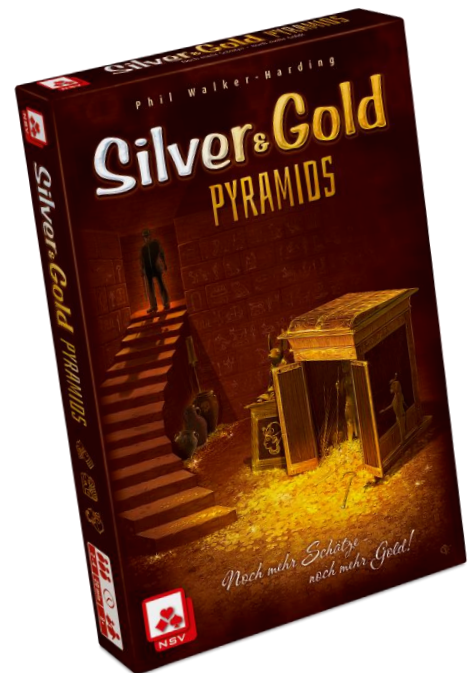

## **SILVER & GOLD PYRAMIDS ... on a treasure hunt!**

**SILVER & GOLD PYRAMIDS** is based on the award-winning concept of the predecessor and sends the players thematically on a new journey set in the world of pyramids.

Using a simple Draw & Write mechanism (draw cards and sketch shapes), your goal is to explore pyramids, collect gems and reach the treasure-filled burial chamber at the end of the card(s), according to the motto "Even more treasures, even more gold!".

Each player selects their two personal pyramid cards from a provided selection. There is also a pile of expedition cards which is valid for all players. Throughout the game, cards are revealed from this pile, and the depicted shapes must be sketched onto the pyramid cards. As the cards gradually fill up, points and treasures are earned.

Just like the original SILVER & GOLD, there's no waiting time in **SILVER & GOLD PYRAMIDS** because everyone plays at the same time.

Easy rules, a quick flow, a fast reward system, planning, and excitement – with the new SILVER & GOLD title, families and frequent gamers can once again expect a lot of great experiences with a dash of luck and strategy. The new title of the SILVER & GOLD family also comes with wipeable cards, ensuring endless adventures!

The game is suitable for two to four players aged eight and older and has a duration of approximately 20 minutes. It will be released as a German version with an MSRP of 14.50 € and will be available in stores from October 2023. Instructions in additional languages, as always, are available on the website of the Nürnberger-Spielkarten-Verlag.
